About Me

Detail-oriented and ambitious engineering student with a passion for obtaining accurate results and working on a team . Seeking an entry-level position in the engineering industry to pursue a career as a Software Engineer and improve my skill set.

Project

• Crud application

A CRUD application is a type of software that stands for Create, Read, Update, and Delete. These applications are used to store data which can then be accessed through various interfaces such as web pages or mobile apps .It is a single page application which is based on API. It uses react as a frontend , mongoDb as a database and express as a backend.

• Chat App

A chatting App based on react.js which uses firebase as a database and google sign in for user authentication.

• Portfolio website

A portfolio website is a unique way to showcase your work and let others know about yourself. It provides professional information about an individual or a company and presents a showcase of their work.

Courses

- Google Data Analytics course from coursera.
